

8-port PoE in-room switch

Article Overview

An 8-port PoE switch provides both network connectivity and power to devices like IP cameras, access points, and VoIP phones, ideal for small offices, home networks, or in-room deployments.

Key Features to Consider

Port Configuration and Speed: Most 8-port PoE switches offer Gigabit Ethernet (10/100/1000 Mbps) ports, with some models supporting 2.5G or multi-gig speeds for higher bandwidth needs. All ports typically support auto-negotiation and MDI/MDIX, simplifying cabling. **PoE Power Budget:** The total PoE power budget varies by model:

- TP-Link LS108GP: 8 PoE+ ports, 62W total, up to 30W per port.
 - NETGEAR GS308PP: 8 PoE+ ports, 83W total, fanless and plug-and-play.
 - Eaton NG8POE-1: 8 PoE++ ports, 60W total, supports up to 30W per port.
 - Ubiquiti USW-Pro-8-PoE: 8 PoE+ ports, 120W total, Layer 3 managed with PoE++ support.
- Management Options:** Switches can be:
- Unmanaged: Plug-and-play, no configuration needed, ideal for simple setups.
 - Smart/Managed: Offer VLAN, QoS, port monitoring, and security features for more control.
- Form Factor and Installation:** Most in-room switches are desktop or wall-mountable, compact, and fanless for silent operation, making them suitable for noise-sensitive environments.
- Special Features:**
- PoE Auto Recovery: Automatically reboots unresponsive devices.
 - Extend Mode: Some switches allow PoE transmission up to 250 meters for cameras or access points.
 - Energy Efficiency: Many models comply with IEEE 802.3az standards to reduce po...
