

A router that can be directly connected to fiber optic cable

Article Overview

Only routers with an SFP port or built-in GPON support can directly connect to a fiber optic cable; most home setups require an ONT to interface with standard routers.

Direct Fiber Connection Requirements

To connect a fiber optic cable directly to a router, the router must have a fiber-compatible port, typically an SFP (Small Form-factor Pluggable) slot or GPON (Gigabit Passive Optical Network) support. These ports allow the router to accept the optical signal from the fiber line without needing an intermediary device. Most standard home routers cannot accept fiber directly and require an Optical Network Terminal (ONT) provided by your ISP, which converts the fiber signal to Ethernet for the router to use .

Recommended Routers for Fiber Internet

Several modern routers are designed to handle fiber internet, either directly via SFP or through high-speed Ethernet from an ONT:

- NETGEAR Nighthawk RS700S (Wi-Fi 7): Supports multi-gig speeds, wide coverage, and up to 200 devices, ideal for large homes or offices .
- ASUS ROG GT-AXE16000: High throughput and ultra-low latency, suitable for gaming and streaming .
- TP-Link Archer AX90 / AX55: Offers a balance of performance and affordability, co...
