

Access Layer Switch Debugging Report

Overview

Click Generate Debug Logs to generate a detailed debugging report. Click Download to download the generated report so that you can send it to technical support. Technical support uses debug reports to diagnose. This document describes how to troubleshoot output drops due to quality of service (QoS) on Cisco Catalyst Switches Series 2960, 3750, 3750G, 3750X, 3560. I have a cisco c3560cx access layer switch that is not allowing DHCP through to devices on a particular VLAN, even ones with reserved addresses. The report is identical to the output of the diagnose debug report. Note: Debugs/show commands shows IOSd's view of the system ex, debug ip packet shows ip packets IOSd has visibility on. • Each Supervisor module and each switch in a stack runs its own Instance of FED. Tracing levels set with granularity (default notice). to help the users to check system configuration, operating status and locate problem causes.
