

Add a protective cover to the distribution box

Article Overview

Use a durable, IP-rated protective cover to safeguard your distribution box from dust, water, and accidental contact while allowing easy monitoring.

Choosing the Right Cover

When selecting a cover for your distribution box, consider the following:

- **Material:** High-quality polycarbonate (PC) or transparent PVC is recommended for durability, impact resistance, and corrosion protection .
- **Protection Rating:** IP65 or IP67 covers provide dustproof and waterproof protection, suitable for both indoor and outdoor installations .
- **Transparency:** Transparent covers allow you to monitor switches, indicators, and circuit breakers without opening the box .
- **Size and Fit:** Ensure the cover matches the number of positions or size of your distribution box (e.g., 2-24 positions for circuit breaker boxes), .

Installation Guidelines

- **Power Off:** Always disconnect the distribution box from the power source before installation to prevent electrical hazards .
- **Mounting:** Most covers come with pre-drilled holes or mounting posts for easy wall or panel installation . Use the supplied screws or brackets to secure the cover.
- **Sealing:** Ensure rubber gaskets or sealing rings are properly positioned to maintain water and dust protection
