

Are fiber optic cable prices rising

Overview

Since early 2026, the fiber optic cable price has been rising at an extraordinary pace. In some cases, suppliers only guarantee quotations for the same day, and in extreme situations even half-day quotations are appearing in the market. For many professionals who have worked in the optical. The global fiber optic industry is entering a new pricing cycle. Over the past several months, upstream material costs and supply chain constraints have pushed fiber prices upward, directly impacting cable assemblies, patch cord production, and passive optical components. 652D fiber has already soared to over 50 yuan per core-kilometer. As an essential component in global telecommunications, defense, and AI infrastructure, prices for products like g657a2 fiber, single mode fiber, and bare fiber have seen dramatic increases since late 2025.
