

Bridge in Sri Lanka

Article Overview

Sri Lanka is home to a diverse range of bridges, from ancient stone structures to modern engineering marvels and natural formations like Adam's Bridge.

Historical and Ancient Bridges

Sri Lanka has a rich history of bridge construction. The earliest bridges, known as Edanda, were simple logs or coconut trunks laid across streams, requiring balance to cross. Stone bridges emerged between the 5th and 9th centuries, with notable examples including Gal Palama in Anuradhapura, a partially restored stone bridge that guided pilgrims to Girihandu Seya, and the stone bridge at Mahakanadarawa Reservoir near Mihinthale. These ancient bridges were integral to pilgrim routes and local transportation, showcasing early engineering skills in the region .

Modern Bridges

Modern infrastructure includes significant bridges like the Kinniya Bridge, the longest in Sri Lanka at 396 meters, connecting Trincomalee with Kinniya over a lagoon. Completed in 2009, it restored connectivity in a region previously affected by conflict . Other notable modern bridges include Kallady Bridge and the Pannai Causeway, which links the Jaffna peninsula with surrounding islands .

Tourist and Iconic Bridges

Sri Lanka also features bridges that are major tourist attractions. The Nine Arch Bridge, also called the Bridge in the Sky, is a colonial-era viaduct built in 1921 entirely from stone and cement without steel. Located between Ella and Demodara, it is famous for its nine symmetrical arches and scenic views of tea plantations and jungle valleys, making it a popular photography spot . The Bogoda Wooden Bridge, another tourist favorite, is an ancient wooden bridge near a cave temple, celebrated for its craftsmanship and historical significance .

Natural Formations

A unique natural bridge is Adam's Bridge (Rama's Bridge or Rama Setu), a chain of limestone shoals connecting Mannar Island in Sri Lanka to Pamban Island in India. Spanning 48 km, some parts are dry, and the shallow waters make navigation difficult. It holds cultural and religious significance, being mentioned in the Ramayana as the bridge built by Rama to reach Lanka
