

Budget for installing multi-purpose junction boxes

Article Overview

Installing multi-purpose junction boxes typically costs between \$100 and \$450 per box, depending on size, material, and installation complexity.

Material Costs

- Plastic junction boxes are the most budget-friendly, costing \$10 to \$60 for standard indoor models. They are lightweight and easy to install but less durable for high-stress or outdoor environments .
- Metal junction boxes are stronger and more durable, suitable for conduit systems or areas requiring extra protection. Prices range from \$70 to \$450, especially for weatherproof or large multi-gang boxes .
- Multi-gang boxes (double or triple gang) allow multiple switches or outlets in one enclosure and cost more than single-gang boxes due to increased size and material requirements .

Labor and Installation Costs

- Labor typically ranges from \$50 to \$130 per hour, with total installation costs for a single box averaging \$100 to \$300, depending on accessibility and wiring complexity .
- Indoor installations in easily accessible locations are less expensive, while attics, crawl spaces, garages, or outdoor areas increase labor costs due to difficulty and additional safety measures
