

CIF price rack cold aisle IP67

Article Overview

CIF pricing for a rack cold aisle containment system with IP67 enclosures varies based on system size, customization, and shipping, and must be obtained directly from suppliers.

Cold Aisle Containment Overview

Cold aisle containment (CAC) systems create an enclosed corridor in front of server racks to ensure that cold supply air is directed efficiently into equipment intakes, preventing mixing with hot exhaust air and improving cooling efficiency . These systems can be modular or custom-built, with options for sliding or hinged doors, roof panels, and gasketed seals to optimize airflow management . Modular solutions like AisleLok® offer tool-less installation and flexible sizing, which can reduce installation costs and allow for rapid deployment .

IP67 Enclosures

IP67-rated enclosures are dust-tight and protected against temporary immersion in water, making them suitable for environments where moisture or dust could affect sensitive electronics . When integrated into cold aisle containment, IP67 enclosures can protect critical components such as power distribution units, sensors, or control panels from environmental hazards.

Factors Affecting CIF Pricing

The CIF (Cost, Insurance, and Freight) price includes the product cost, shipping, and...
