

Cable tray pricing in the Netherlands

Article Overview

Cable tray prices in the Netherlands vary widely depending on material, type, and size, typically ranging from €20 to over €200 per meter for standard industrial and commercial trays.

Overview of Cable Tray Types and Materials

Cable trays are used to support and organize electrical cables in commercial, industrial, and residential settings. Common types include ladder trays, wire-mesh trays, solid-bottom trays, and channel systems, fabricated from steel, aluminum, or stainless steel to meet load, corrosion, and fire safety requirements. Stainless steel trays, for example, offer high durability and corrosion resistance, with widths from 25 mm to 600 mm and lengths of 3 meters, often priced higher due to material quality.

Price Ranges

- Standard steel or aluminum trays: Typically €20–€80 per meter, depending on width, height, and load capacity.
- Wire-mesh or modular trays: Usually €50–€120 per meter, offering flexibility and easier installation.
- Stainless steel trays (AISI 304): Can range from €100–€200+ per meter, especially for custom dimensions or specialized locking designs. Prices are influenced by material costs, tray dimensions, load capacity, and supplier location. Transportation and handling costs are also significant due to the bulky nature of trays, with suppliers near major demand centers like Randstad (Amsterdam, Rotterdam, The Hague, Utrecht) often offering better logistics and competitive pricing
