Factors Affecting Price

- Material: Stainless steel trays are more expensive than galvanized steel or aluminum trays. Aluminum trays are lighter and often used for transport or temporary installations .
- Size and Length: Larger width and depth trays cost more due to higher material usage. Standard lengths are usually 2–3 meters.
- Type: Wire mesh trays, perforated trays, and solid-bottom trays have different manufacturing costs, affecting the price.
- Supplier and Import/Export Data: Export data shows that Ukrainian cable trays are traded internationally, and prices can vary depending on shipment volume and supplier reliability .

Market Overview

Ukraine produces and imports cable trays, with domestic suppliers like LLC Avers-Techno and SOIR Ltd. offering steel and aluminum products . Retail and wholesale prices may differ, and bulk purchases often reduce the per-unit cost. Market reports indicate that cable tray consumption is growing, with demand for both industrial and residential installations . In summary, expect to pay between 35 UAH for small accessories and up to 1,845 UAH for large stainless steel trays per 2.5 m section, with prices influenced by material, size, and supplier.
