

Cable tray sealing process price

Article Overview

Cable tray sealing systems typically range from \$50 to \$300 per tray section, depending on size, material, and fire or environmental ratings.

Cost Factors

The price of sealing a cable tray depends on several key factors:

- **Tray Size and Cable Density:** Larger trays or those carrying multiple cables require bigger or more complex sealing modules, increasing cost .
- **Material:** Seals are made from high-grade polymers like EPDM, silicone, or polyurethane, while frames may be stainless steel, aluminum, or galvanized steel . Higher-grade materials for chemical, UV, or corrosion resistance increase the price.
- **Fire and Ingress Protection Ratings:** Systems with firestop certification, IP66 ingress protection, or smoke barriers are more expensive due to testing and compliance requirements .
- **Installation Complexity:** Modular, flexible designs reduce labor costs, but custom or retrofit installations may require additional engineering and labor .

Typical Price Ranges

- **Standard modular seals for small to medium trays:** \$50-\$150 per tray section .
- **High-performance firestop or IP-rated systems:** \$150-\$300 per tray section .
- **Custom or large-scale industrial solutions:** Prices can exceed \$300 per section, especially for underground or high-pressure water applications
