

Cambodia Fiber Optic Network Connector

Article Overview

Fiber optic cable connector packages in Cambodia include SC, LC, and APC types, available from multiple local suppliers with customizable lengths and core counts.

Available Connector Types and Packages

In Cambodia, fiber optic connectors are commonly available in SC, LC, and APC configurations, suitable for both single-mode and multimode fibers (). Packages typically include pre-terminated cables with connectors on both ends, such as SC APC M/M 3M, which provides high-speed, reliable connectivity for networking and telecommunications applications (). Connector packages may come in various lengths, commonly ranging from 1 meter to 100 meters or more, depending on project requirements.

Technical Considerations

When selecting a fiber optic connector package, consider:

- Fiber Type: Single Mode (G.652D, G.657A2) or Multimode (OM1, OM2, OM3, OM4) ().
- Core Count: Options include 24, 48, 144 cores for larger network deployments ().
- Attenuation and Bandwidth: Ensure low signal loss and sufficient bandwidth for your application ().
- Environmental Protection: Outdoor cables may include moisture-resistant gel filling and reinforced jackets (e.g., GYFTA) for durability ().
