

Charging Pile Cable Tray Installation Price

Article Overview

Cable tray installation for EV charging piles typically costs between \$5 and \$30 per meter, depending on material, size, and installation complexity.

Cost Breakdown

Material Choice:

- Steel trays are the most common, costing approximately \$5-\$25 per meter. They offer strength and durability for general indoor or protected installations .
 - Aluminum trays are lightweight and corrosion-resistant, ideal for outdoor or humid environments, with prices ranging from \$6-\$30 per meter .
 - Fiberglass trays are less common but suitable for chemical or highly corrosive environments, often priced similarly to aluminum .
- Tray Type and Size:
- Ladder-type trays are generally easier to install and may be slightly cheaper than solid-bottom trays.
 - Larger trays or those designed to carry high-current EV charging cables may increase costs due to additional supports and connectors .
- Installation Complexity:
- Labor costs vary depending on mounting method (strut, standoff brackets, or direct fixing), building structure, and accessibility.
 - Typical installation time is around 20 minutes per meter for standard setups, but complex routing or long cross-lot runs can increase labor costs .
 - Additional components like supports, brackets, and connectors add to the total cost .
