

Check the IP address of the aggregation switch

Article Overview

You can check the IP address of an aggregation switch via its management interface, DHCP server, or controller software depending on the switch model.

Using the Switch Management Interface

Most aggregation switches, such as the Ubiquiti USW-Pro, have a management touchscreen or web interface where the IP address is displayed. On the front panel touchscreen, you can view the LAN IP address, firmware version, and port status directly. For remote access, you can also log in to the switch's web interface if the IP is known, allowing you to configure VLANs, monitor traffic, and manage ports .

Using DHCP Server Lookup

If the switch is configured to obtain an IP address automatically via DHCP, you can find its IP by checking the DHCP client list on your router or DHCP server. Look for the switch's hostname or model number in the lease table; the corresponding IP is the switch's current address .

Using Controller Software

For managed switches like Ubiquiti models, you can use UniFi Controller Software to discover and manage the switch. Ensure your PC and switch are on the same network segment, then add the switch to the controller using its MAC address and device na...
