

Cold aisle rack price 6

Article Overview

Cold aisle containment systems vary widely in price depending on size, modularity, and manufacturer, typically ranging from a few hundred to several thousand dollars per rack unit.

Factors Affecting Price

- **Rack Size and Height** Cold aisle racks are commonly available in 42U, 45U, and 48U heights, with standard widths of 600 mm or 750 mm. Larger or wider racks generally cost more due to additional materials and structural support .
- **Modularity and Customization** Many systems, such as those from Eaton, Vertiv, and AZE, offer modular kits that can accommodate 4-6 standard-width racks per side or 4-5 wide racks per side. Modular designs allow for future expansion but can increase initial costs .
- **Components Included** Prices depend on whether the kit includes roof panels, sliding doors, magnetic filler panels, riser panels, and brush strips. Systems with key-locking doors and clear acrylic panels for security and monitoring are typically more expensive .
- **Installation and Compatibility** Some systems are designed for easy installation without contractors, which can reduce labor costs. Compatibility with existing racks and raised floor applications may also influence pricing .
- **Brand and Supplier** Trusted brands like APC, Rittal, Vertiv, and AZE may charge a premium for reliability, warranty, and support. Custom solutions from manufacturers like AZE can be tailored to specific requirements but may increase cost .
