

Color sequence of ten-core optical fiber cable

Article Overview

A ten-core optical fiber cable follows the TIA-598-C standard, using the first ten colors of the 12-color sequence: Blue, Orange, Green, Brown, Slate, White, Red, Black, Yellow, and Violet.

Standard Color Sequence for 10 Fibers

For a ten-core cable, each fiber is assigned a unique color from the TIA-598-C standard sequence:

- Blue
 - Orange
 - Green
 - Brown
 - Slate (Gray)
 - White
 - Red
 - Black
 - Yellow
 - Violet
- This sequence ensures that each fiber can be easily identified during installation, splicing, and maintenance, reducing the risk of miswiring or cross-connections .
