

Denmark ONT Optical Network Terminal QSFP28

Article Overview

ONT devices with QSFP28 ports enable high-speed 100G optical connectivity for data centers, metro networks, and system verification applications.

Overview of ONT with QSFP28

An Optical Network Terminal (ONT) is a device that terminates optical fiber lines and converts optical signals into electrical signals for network devices. When equipped with QSFP28 ports, an ONT can support 100G Ethernet or OTN connections, providing ultra-high-speed data transfer suitable for modern data centers, backbone networks, and enterprise environments .

QSFP28 Port Features

- Form Factor: QSFP28 is a compact, four-channel module that supports 100G/112G speeds (4x25Gbps or 4x28Gbps) in a single connector .
- Compatibility: QSFP28 modules are compatible with IEEE802.3bm, SFF-8636, and ITU-T G.959.1 standards, supporting SR4, LR4, ER4, and ZR4 optical interfaces .
- Applications: Widely used in high-bandwidth data center switches, backbone routers, storage systems, and AI workloads, enabling fast interconnects between servers and network equipment .
