

Direct Burial Armored Gyts Optical Cable Factory

Article Overview

Direct burial armored GYTS optical cables are manufactured by specialized fiber optic factories offering high-strength, rodent-resistant, and long-life outdoor cables suitable for underground installations.

Overview of GYTS and GYTA53 Cables

GYTS and GYTA53 cables are designed for direct burial without additional conduits, making them ideal for telecommunication networks in cities, rural areas, roads, and railways . These cables feature:

- Stranded loose tube design with gel-filled tubes for fiber protection and stable transmission .
- Double or single armored layers using corrugated steel tape or steel wire for mechanical strength and rodent resistance .
- High-density polyethylene (HDPE) outer jackets for UV, moisture, and abrasion resistance .
- Central strength members made of phosphated steel wire or FRP to enhance tensile performance .

Rodent and Environmental Protection

Direct burial armored cables often include anti-rodent features:...
