

Distribution Box Fixed Rail

Article Overview

A Distribution Box Fixed Rail is an electrical enclosure or terminal block system designed for secure mounting on a DIN rail, enabling organized and flexible distribution of power, signals, or control currents.

Overview

A distribution box is a component of an electrical system that divides a main power feed into subsidiary circuits while providing protection via fuses or circuit breakers. Fixed rail distribution boxes are specifically designed to be mounted on DIN rails (typically TH35 top-hat rails), allowing modular installation and easy integration into industrial panels, building automation systems, or fiber optic networks .

Types and Features

-

DIN Rail Distribution Boxes

- Used for electrical or fiber optic connections.
- Can accommodate pre-assembled cables and adapters, such as LSH/APC fiber adapters, with capacities up to 24 fibers .
- Mounting options include central or asymmetrical fastening on the rail .
- Provide mechanical protection, environmental protection, and organized cable management .
