

Distribution box model length width depth

Article Overview

Distribution boxes come in various models with customizable length, width, and depth, designed to accommodate different numbers of switches and electrical loads.

Standard Models and Specifications

Distribution boxes are available in multiple models such as TOP-TS, TOP-TF, TOP-LS, TOP-PS, TOP-PF, and TOP-S, with configurations ranging from 1-way to 36-ways. The dimensions of these boxes—length, width, and depth—vary depending on the number of switches, incoming wire size, and intended application, whether for residential, commercial, or industrial use .

Household Distribution Boxes

For household applications handling lighting circuits or small power loads:

- Incoming wire size $< 10 \text{ mm}^2$ and fewer than 20 switches:
- Width = sum of switch widths + 20 mm on each side
- Height = switch height + 40 mm
- Depth = maximum switch depth + 10 mm
- More than 20 switches:
- Designed for two rows of switches
- Width = sum of switch widths + 40 mm...
