

Do I still need a router if I have a fiber optic port

Overview

A: No, you do not need a special fiber-specific router. Any standard consumer router with a Gigabit Ethernet WAN port will work fine with fiber internet, because the ONT handles the conversion from the optical fiber signal to a standard Ethernet signal before it ever reaches your. Yes, you can use your own router with fiber internet, as long as it has a Gigabit Ethernet WAN port to connect to your ISP's Optical Network Terminal. Just know that bringing your own gear means you. Do I Need a Special Router for Fiber Optic Internet?

You don't need a special router, per se, but you do need one that can handle the speed fiber provides. If you're paying for gigabit fiber service, make sure your router supports at least gigabit Ethernet ports and dual-band or tri-band WiFi (like. TL;DR: You don't use a modem for fiber —you use an ONT plus a router. Do I need a modem for fiber or just a router?

What replaces a modem for fiber?

Fiber doesn't use a traditional cable/DSL modem. A standard router works if it supports gigabit speeds; some ISPs bundle router and ONT in one gateway. It does this by converting the digital signals from your internet service provider (ISP). Here is the topic's answer before we get into the details: yes, you can absolutely use a normal router with a fiber optic internet connection.
