

Does a 48-core ribbon fiber optic cable exist

Overview

These cables contain 48 individual optical fibers arranged in a flat ribbon configuration, enabling faster splicing, simplified management, and efficient use of space. FX Indoor, Flexible Ribbon, OS2, 48 Fibers, OFNP, Sub-Units 3. Tensile Strength During Installation Max. Tensile Strength During Operation Corning ribbon plenum cables are designed for use in plenum, riser and general purpose environments for intrabuilding backbone installations and for high-fiber-count data centers. Due to some extremely long shortages in OSP, Ribbon and other fibers we have available many types of fibers that are overstock and ready to ship along with new fiber cable production for Ribbon, OSP, ADSS, OPGW, Loose Tube that is not Corning but meets all Telecordia specs.
