

Does the terminal box need a sleeve

Overview

Non-insulated terminals are bare metal connectors—typically tinned copper or brass—without any sleeving, offering a compact and economical connection where secondary insulation or an enclosed environment already exists. Our portfolio of terminal housings, insulation sleeves, and blocks provide mechanical and electrical protection for many different types of terminals, and both single- and multiple-terminal types. A. Designed to meet the demands of both industrial and hazardous environments, the 8150 Series is your all-in-one solution, no matter your industry. Our products are certified for installation technologies all over the. Pepperl+Fuchs offers a comprehensive range of terminal boxes and junction boxes in types of protection Ex e (increased safety), Ex ia (intrinsic safety), Ex tb (dust protection by enclosure), and Ex op pr (protected optical radiation).
