

EU Cable Tray Seismic Bracing Brands

Article Overview

Leading EU brands for cable tray seismic bracing include Eurotray, DKC Europe, UNISTRUT, and Eaton.

Eurotray

Eurotray, a subsidiary of the Çemesan Group, manufactures a wide range of cable management systems including trays, mounting supports, and seismic bracing components. Their products are designed for heavy cable loads and vertical applications, making them suitable for industrial, data center, and food manufacturing environments. Eurotray emphasizes earthquake-resistant installations with specialized suspension and connection elements to prevent destructive movement during seismic events .

DKC Europe

DKC Europe is a prominent European supplier of cable tray systems and energy distribution solutions. They offer comprehensive cable management solutions suitable for civil and industrial infrastructures, including seismic bracing options. Their systems are designed to meet European standards for safety and structural integrity .

UNISTRUT

UNISTRUT provides seismic bracing solutions with decades of experience in high-seismic zones. Their products comply with international building codes, including OSHPD, IBC, and ASCE standards. UNISTRUT offers a variety of bracing components, including rod stiffeners and structural attachments, ensuring reliable performance in earthquake-prone areas .

Eaton (TOLCO)

Eaton's TOLCO seismic bracing solutions are widely used in mechanical, electrical, and fire protection systems. Their Fig. 3000 Brace system provides labor-saving installation and patented designs to prevent compression and maintain structural integrity during seismic events. Eaton emphasizes compliance with IBC, ASCE 7, and NFPA 13 standards, making their products suitable for EU projects that require high seismic performance
