

Earthquake-resistant cable tray supplier

Article Overview

Eurotray, EAE Electric, and Eaton are leading companies providing seismic-rated cable tray support systems designed to withstand earthquakes.

Eurotray Support Systems

Eurotray, a subsidiary of Çemesan Group, specializes in seismic bracing systems for cable trays and other MEP installations. Their solutions are designed to prevent structural damage during earthquakes by integrating energy-dissipating components, controlled movement joints, and multi-directional load capacity. Eurotray's systems are widely used in critical facilities such as hospitals and data centers, ensuring safety and minimizing post-disaster recovery costs .

EAE Electric

EAE Electric offers the E-Line Seismic Support Systems, which provide rigid, earthquake-resistant solutions for cable trays, pipes, and ducts. These supports are engineered to mitigate horizontal shaking by securely anchoring equipment to structural components, allowing the system to move in sync with the building during seismic events. EAE Electric emphasizes quick installation with accessories compatible with steel beams and space roof connections, making it suitable for a variety of building types .

Eaton (TOLCO)

Eaton's TOLCO seismic bracing solutions protect non-structural components, includi...
