

Fiber Distribution Box 32 Cores

Article Overview

A 32-core fiber distribution box is designed for FTTH/FTTB networks, supporting up to 32 fiber connections with integrated splicing, splitting, and cable management in a weatherproof enclosure.

Overview

A 32-core fiber distribution box serves as a central point for connecting feeder cables to distribution or drop cables in FTTx networks. It integrates splicing, signal splitting, storage, and cable distribution within a single enclosure, providing protection for fiber joints and enabling both straight-through and branch connections in residential or commercial buildings .

Key Features

- **Capacity:** Supports up to 32 fiber cores and can accommodate 1×32 PLC splitters or 1×16 splitters depending on configuration .
- **Splicing and Splitting:** Compatible with fusion splice, mechanical splice, and optical splitters, allowing flexible network design .
- **Material and Protection:** Made from impact-resistant plastics or metal, with anti-UV, shock-resistant, and waterproof design (IP65 or higher), suitable for outdoor installation .
- **Cable Management:** Multi-layer internal design provides independent compartments for splicing and splitting, maintaining proper fiber bend radius (>40mm) and organized routing .
- **Mounting Options:** Can be wall-mounted or pole-mounted, compatible with corrido...
