

Fiber Optic Cable Pull Clamp

Article Overview

Fiber optic cable pulling clamps are specialized tools designed to securely grip and facilitate the installation of fiber optic cables in overhead, underground, or conduit applications.

Purpose and Function

Fiber optic cable pulling clamps, also known as pulling grips, are used to secure, stabilize, and guide fiber optic cables during installation. They prevent damage to the delicate fibers, maintain proper alignment, and allow for smooth pulling through conduits, ducts, or aerial pathways . These clamps are essential for both overhead and underground installations, ensuring that cables are not stressed or kinked during the pull .

Types of Fiber Optic Clamps

- **Wall-Mount Clamps:** Attach to walls or surfaces to secure cables in overhead systems. They accommodate various cable diameters and provide stable support .
- **D-Ring Clamps:** Feature a D-shaped bracket that locks around the cable, commonly used in ceilings or suspended locations without crimping the cable .
- **Surface-Mount Clamps:** Low-profile clamps for floors, walls, or equipment racks, ideal for confined spaces .
- **T-Clamps:** Designed for outdoor or aerial installations, securing cables to T-shaped brackets in high-wind or vibration-prone environments .
- **Pulling Grips with Flexible Eyes:** These grips have a flexible pulling eye for easy attachment to pulling lines, suitable for conduits, underground ducts, or overhead cable runs .

Materials and Construction

Most fiber optic pulling clamps are made from galvanized steel or high-grade American steel, providing durability and resistance to wear during installation . Some products, like the Fiber Reaper, feature adjustable straps that can accommodate different cable diameters and configurations, making them versatile for splicing and pulling tasks .

Safety and Usage

When using fiber optic pulling clamps, it is critical to adhere to the manufacturer's working load limits to prevent accidents or cable damage . Proper installation ensur...
