

Fiber Optic Cable Tray Laying Method

Overview

Many people are confused about the hanging of aerial optical cables. In fact, there are two methods for aerial optical cables laying: one is "fixed-pulley traction method", including "manual traction method" and "mechanical traction method"; the other is "cable tray . 's Fiber Tray system. It covers the most common components used in a fiber tray installation, but each installation is different and the unique circumstances and requirements of any given installation environme qualified technicians. For the purposes of this guideline, a qualified technician is. Watch an installation of fiber cable tray, and know clearly how to put those parts together. The Fiber Optic Association, Inc. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. To use these holes for fiber installation, first use a mini hand drill to drill U-shaped holes as pre-outlined in the Cable Tray Base.
