

Fiber Optic Spectrometer Calibration in Denmark

Article Overview

Fiber optic spectrometer calibration in Denmark can be performed by accredited laboratories such as DFM, Danish Technological Institute, and SGS Denmark, or via specialized spectral calibration light sources from Avantes.

Accredited Calibration Laboratories

DFM (Danish Fundamental Metrology) offers ISO 17025-accredited calibration services for fiber optic and laser measurement systems. Their calibrations are traceable under the CIPM-MRA international recognition agreement, ensuring global acceptance of results. DFM provides customized measurements and precision calibrations for laboratories, industry, and authorities, and maintains a quality system certified to ISO 9001 standards. Danish Technological Institute (DTI) provides a wide range of accredited calibration services, including on-site calibration using mobile units. Their services cover international approvals and supplementary certifications, allowing companies to have all calibration needs met by a single provider. SGS Denmark offers instrumentation calibration services with traceability to international measurement standards. Their experts handle various equipment types, ensuring high measurement accuracy and reduced uncertainty, which is critical for fiber optic spectrometer performance.
