

Fiber Optic Spectrometer Calibration in Tanzania

Article Overview

Fiber optic spectrometer calibration in Tanzania can be performed by accredited local laboratories such as TBS, Caltes, and SGS, ensuring traceability to international standards.

Local Calibration Providers

Tanzania Bureau of Standards (TBS) offers apex-level calibration services for various precision instruments, including optical and electronic measurement devices. Their metrology laboratories maintain national measurement standards and provide traceable calibration services to ensure reliable and accurate results for research and industrial applications. Caltes Company Limited provides accredited calibration services recognized by the Southern African Development Community Accreditation Services (SADCAS), which is part of the ILAC Mutual Recognition Arrangement. They specialize in traceable calibration for a wide range of instruments, including fiber optic equipment, and offer consultancy and training in metrology. SGS Tanzania also offers instrumentation calibration services with traceability to international reference standards. Their services cover dynamic and static measurement systems, ensuring high accuracy and reduced measurement uncertainty for industrial and laboratory applications.
