

Finland Fiber Optic Panel Intelligence

Overview

The country-specific report, compiled by the Market Intelligence Committee and IDATE, provides data-driven insights on key performance indicators such as homes passed, subscribers, take-up rate, coverage rate, and penetration rate, along with trends and growth patterns observed. The country-specific report, compiled by the Market Intelligence Committee and IDATE, provides data-driven insights on key performance indicators such as homes passed, subscribers, take-up rate, coverage rate, and penetration rate, along with trends and growth patterns observed. Consumer surveys refer to online panel surveys commissioned by Traficom. The situational picture is produced by the Finnish Transport and Communications Agency Traficom. At the end of September 2025, broadband networks based on optical fibre covered 80% of households in Finland, corresponding to. The Finnish authorities favour a competition-driven, fibre-based network roll-out assisted by public funds for underserved areas and advice for local municipalities on how to deploy digital connectivity networks. The report presents recommendations for measures to strengthen Finland's economic growth, competitiveness and capacity for renewal through digitalisation, emerging technologies and the data. At the end of September 2024, fibre-optic network connections were available to 68% of Finnish households. In addition, 75% of households could opt for a fixed connection with a minimum download speed of 1 Gbps. AI-powered network intelligence delivers analytics and.
