

Future Development of the Guatemala-Che Fiber Optic Cable

Article Overview

The Guatemala-Che fiber optic cable, part of the Southern Pacific Submarine Cable System (SPSC), is set to enhance national connectivity, expand broadband access, and support economic growth across urban and rural areas.

Project Overview

The Guatemala-Che fiber optic cable is planned as an underwater submarine cable in the Escuintla department, designed to improve telecommunications services including internet, data, and communication infrastructure in Guatemala . The project, submitted by Telecomunicaciones de Guatemala, S.A., has undergone an Environmental Impact Assessment (EIA), reflecting regulatory compliance and environmental considerations . This cable is part of the broader Southern Pacific Submarine Cable System (SPSC), which aims to strengthen Guatemala's digital backbone and integrate it with regional and international networks.

Market and Investment Trends

Guatemala's fiber optic market is projected to grow at a compound annual growth rate (CAGR) of 8.14% in 2025, peaking at 8.22% in 2026, and moderating to 7.68% by 2029 . This growth is driven by increasing demand for high-speed broadband, particularly fiber-to-the-home/business (FTTH/B) services, and the expansion of metro and regional networks by major providers like Tigo, Claro, and Cablenet . Fixed broadband revenues are expected to nearly double from US \$470 million in 2024 to...
