

Heating Cabinet Distribution Box Installation Price

Article Overview

The cost of a heating cabinet distribution box, including installation, typically ranges from €150 to €600 or more, depending on type, size, and features.

Cabinet Types and Prices

Surface-Mounted Cabinets: These are pre-assembled, robust, and easy to install, ideal for both new builds and renovations. For example, the ENVIRON surface-mounted distribution box is made of galvanized steel, corrosion-resistant, and ready for immediate connection, which reduces labor costs. Prices for such cabinets generally start around €150–€300, depending on size and number of circuits.

Flush-Mounted Cabinets: Installed within walls, these cabinets provide a cleaner look but require more labor for wall cutting and mounting. FLEXIRO flush-mounted mini-distributors for underfloor heating systems are designed for retrofitting and can include smart home upgrades, which may increase the price to €250–€500 or more.

Commercial or High-Capacity Cabinets: Larger or modular cabinets with multiple circuits, DIN rails, or advanced monitoring features can cost €400–€600 or higher, especially if they include weatherproofing or smart energy management capabilities.

Installation Costs

Installation costs vary based on complexity, location, and labor rates:

- **Basic Installation:** Connecting a single heating circuit distributor in a surface-mou...
