

How much does a 90-degree cable tray cost

Article Overview

The cost of a 90-degree cable tray elbow typically ranges from \$20 to \$150 per piece, depending on material, size, and load capacity.

Price Factors

The price of a 90-degree cable tray elbow varies based on several key factors:

- **Material:** Galvanized steel is the most cost-effective and widely used option, while stainless steel (304 or 316 grade) is more expensive due to superior corrosion resistance. Aluminum and PVC or fiberglass variants are priced differently depending on weight, durability, and chemical resistance requirements .
- **Size and Dimensions:** Larger widths and heights to accommodate heavier cable loads increase the cost. Standard widths range from 12 inches to 24 inches, with prices rising for wider or custom sizes .
- **Load Capacity:** Heavy-duty elbows designed to support large bundles of power or control cables are more expensive than light-duty versions .
- **Compliance and Certifications:** Products meeting fire resistance ratings (e.g., E90), CE marking, UL, or IEC standards may carry a premium due to testing and certification costs .
- **Finish and Coatings:** Powder-coated or fire-retardant finishes add to the cost for enhanced durability and safety .
