

How much does a low-loss fiber optic panel cost in Congo

Article Overview

A high-quality ultra-low-loss (ULL) fiber optic panel typically costs between \$500 and \$2,000 per unit, depending on density, fiber type, and pre-termination, with additional costs for shipping and installation in Congo.

Panel Pricing Overview

Ultra-low-loss fiber optic panels, such as SYSTIMAX ULL solutions, are designed for minimal signal attenuation (≤ 0.35 dB per cassette) and high-density applications, supporting 400G-800G links. The base cost of a single ULL panel can range from \$500 to \$1,500 for standard 1U or 2U panels with pre-terminated cassettes. High-density or specialized panels with 144+ fibers per 1U may reach \$2,000 or more. Pre-terminated fiber trunks and OM4/OM5 multimode or single-mode fibers add to the cost.

Additional Cost Factors

- **Shipping and Import Duties:** Importing panels to Congo may add 10-30% to the base price due to freight, customs, and taxes.
- **Installation Labor:** Fiber installation labor in Africa varies widely; typical rates range from \$75 to \$180 per hour, with 8-40 hours per project depending on complexity.
- **Supporting Hardware:** Patch cords, adapters, and cable management accessories can add \$50-\$200 per panel.
- **Environmental Considerations:** Outdoor or harsh-environment installations may require armored or plenum-rated panels, increasing costs by \$100-\$500 per unit
