

How much does a low-voltage intelligent distribution box cost

Article Overview

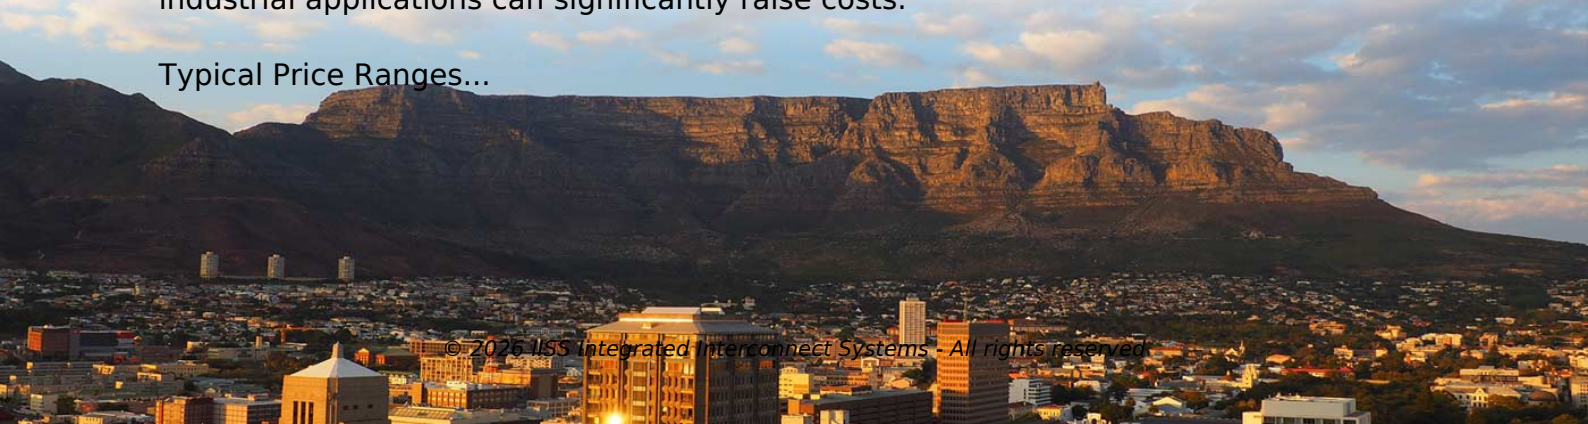

The cost of a low-voltage intelligent distribution box typically ranges from a few hundred to several thousand USD, depending on specifications, monitoring features, and customization.

Factors Affecting Cost

The price of an intelligent low-voltage distribution box is not fixed and depends on multiple factors :

- Rated current and outgoing circuits: Higher current ratings and more branch circuits increase cost.
- Monitoring and intelligence level: Basic monitoring measures incoming voltage and current, mid-level adds branch monitoring, and high-end systems include detailed branch metering, alarms, touchscreen interfaces, and remote communication.
- Cabinet size and design: Larger enclosures with better ventilation, IP rating, and cable entry options cost more.
- Component quality and brand: Premium breakers, fuses, and modular components increase the price.
- Customization: Special requirements for data centers, medical facilities, or industrial applications can significantly raise costs.
