

How much does a switchgear distribution box cost in China and Africa

Article Overview

Switchgear in China typically ranges from \$250 to over \$10,000 depending on type and voltage, while distribution boxes cost between \$50 and \$1,000; African prices are generally higher due to import and logistics costs.

Costs in China

Low-voltage (LV) switchgear for residential or small commercial use generally costs \$250–\$1,000 per unit, suitable for buildings, small factories, and auxiliary circuits . Medium-voltage (MV) switchgear for industrial plants, hospitals, or large commercial centers ranges from \$500–\$2,500 per unit . High-voltage switchgear using air-insulated (AIS) technology costs \$700–\$1,500 per bay, while gas-insulated (GIS) units for urban or space-constrained installations can range from \$4,000 to \$10,000+ per bay . Hybrid systems combining AIS and GIS technologies typically cost \$2,500–\$6,000 . Distribution boxes in China, including standard and custom OEM units, generally cost \$50–\$100 for simple units, while more complex or smart distribution cabinets can reach \$500–\$1,000 per unit . Prices vary based on specifications, IP rating, modularity, and order volume . Factors affecting Chinese prices include raw material costs (steel, copper), circuit breaker technology, brand premiums, and regional market differences. For example, high-quality high-voltage switchgear in East China averaged 112,000 yuan (~\$16,000) per unit in 2025 due to brand and material costs .
