

How much does an explosion-proof level 3 distribution box cost

Article Overview

The price of a Level 3 explosion-proof distribution box typically ranges from \$1,000 to \$5,000 or more, depending on size, material, number of circuits, and customization options.

Overview

A Level 3 explosion-proof distribution box is designed for hazardous environments such as petroleum, chemical, natural gas, and pharmaceutical industries. These boxes are built to contain internal explosions and prevent ignition of surrounding flammable gases, vapors, or dust, complying with standards like GB3836.2-2000, ATEX, IECEx, or UL 1203 depending on the region . They are typically constructed from aluminum alloy, carbon steel, or stainless steel, with protection ratings ranging from IP54 to IP66, and can include features like multi-pole circuit breakers, ground leakage protection, thermostatic control, and optional alarm devices .

Factors Affecting Price

- **Material and Construction:** Aluminum alloy boxes are generally less expensive than stainless steel or reinforced carbon steel enclosures .
- **Number of Circuits:** Configurations can range from 1 to 12 circuits, with more circuits increasing cost due to additional breakers and wiring .
- **Input Voltage and Phase:** Single-phase or three-phase input options may affect pricing, especially for higher voltage industrial applications .
- **Certifications:** Boxes certified for multiple standards (UL, ATEX, IECEx, CCC) or hig...
