

How much does custom pigtail fiber cost

Article Overview

A set of fiber optic pigtails typically costs between \$10 and \$50, depending on fiber type, connector, and environmental specifications.

Price Range and Factors

The cost of a set of pigtails varies based on several factors:

- **Fiber Type:** Single-mode (OS2) pigtails are generally more expensive than multi-mode (OM1, OM2, OM3, OM4, OM5) due to performance requirements .
- **Connector Type:** LC, SC, or APC connectors affect price; APC polish versions are slightly higher due to lower back reflection .
- **Set Size:** Pigtails are sold individually or in sets, commonly 12 fibers per set . Sets are more cost-effective per fiber than buying individually.
- **Jacket and Protection:** Armored or PE jackets increase cost by 30-60% compared to standard PVC, providing better protection in industrial or outdoor environments .
- **Length and Customization:** Longer pigtails or custom connector types can increase the price .

Example Pricing

- A 12-fiber multi-mode OM2 set with standard LC/PC connectors may cost around \$15-\$25 .
- Armored single-mode SC/APC pigtails with PE jackets can add roughly \$0.40 per pigtail compared to standard indoor versions, making a 12-fiber set approximately \$20-\$50 depending on specifications
