

How much does it cost to install it in the distribution box

Article Overview

Installing a distribution box typically costs between \$600 and \$4,000, depending on panel size, amperage, location, and installation complexity.

Cost Breakdown

Material Costs: The price of the distribution box itself varies widely based on size, enclosure material, and internal components. Basic residential panels can start around \$150–\$450, while industrial-grade or stainless steel units with high-quality breakers and surge protection can reach \$1,500–\$2,000 or more .

Labor and Installation: Professional installation is essential for safety and compliance. Labor costs depend on panel accessibility, wiring complexity, and whether the installation is indoor or outdoor. Typical residential installations for a 100–125A indoor panel range from \$1,200–\$2,500, while a 200A outdoor upgrade with a new meter socket can cost \$3,000–\$6,000 .

Permits and Additional Costs: Permit fees, disposal of old panels, and any structural modifications can add to the total. Urban areas may have higher permit and delivery fees, while rural locations may save on labor but incur transport costs for specialized panels .

Factors Affecting Price

- **Amperage:** Higher amperage panels (200A or more) cost more due to larger components and increased labor .
- **Panel Type:** Indoor vs. outdoor enclosures, modular designs, and smart monitorin...
