

How to connect an FC fiber optic connector

Article Overview

FC fiber optic connectors use a threaded screw mechanism to ensure a secure, low-loss connection, ideal for high-vibration environments.

Overview of FC Connectors

The FC (Ferrule Connector) is designed for single-mode and polarization-maintaining fibers, featuring a threaded coupling mechanism that prevents accidental disconnections and ensures precise alignment of the fiber cores . The connector typically consists of three main parts: the ferrule, the threaded metal barrel, and the coupling nut. The ferrule, often made of zirconia ceramic or stainless steel, holds the fiber in place and is polished to a physical contact (PC) finish to minimize insertion loss and back-reflection .

Tools and Preparatory Work

Before connecting an FC fiber optic cable, gather the following tools:

- Fiber strippers and cleaver
 - Crimping pliers
 - Fiber holders
 - UV or epoxy glue
 - UV lamp for curing
 - Anhydrous alcohol and lint-free wipes for cleaning
- Inspect the fiber for damage, e...
