

How to connect an SC connector fiber optic cable to a router

Article Overview

To connect a fiber optic SC connector to a router, you typically plug the SC connector into an Optical Network Terminal (ONT) and then link the ONT to your router via an Ethernet cable.

Required Equipment

- Fiber Optic Cable with SC Connector: Usually single-mode SC/APC or SC/UPC, provided by your ISP .
- Optical Network Terminal (ONT): Converts optical signals to electrical signals for your router .
- Router: Must support Ethernet WAN input; some routers have direct SFP ports for fiber .
- Ethernet Cable: To connect the ONT to the router .
- Cleaning Supplies: Alcohol wipes and lint-free cloths to clean connectors before insertion .

Step-by-Step Connection

- Locate the Fiber Outlet: Identify the wall outlet where your ISP's fiber line terminates .
- Prepare the SC Connector: Ensure the SC connector is clean and free of dust. Use alcohol wipes if necessary .
- Connect to the ONT: Insert the SC connector into the designated port on the ONT. Align the connector carefully and push until it clicks into place
