

How to connect the fiber optic cable when making a fiber optic patch cord

Article Overview

Connecting a fiber optic cable to make a patch cord involves careful preparation, precise cleaving, proper connector installation, and thorough testing to ensure optimal signal performance.

Tools and Materials Needed

- Fiber optic stripper: Removes the outer jacket and buffer coating without damaging the fiber .
- Precision cleaver: Ensures a clean, perpendicular cut on the fiber endface .
- Fiber optic connectors: LC, SC, ST, or FC, chosen based on network compatibility .
- Epoxy or UV glue and UV lamp (for field-terminated connectors), .
- Crimping pliers or fiber optic crimper: Secures the connector to the fiber .
- Cleaning tools: Fiber cleaning pens, lint-free wipes, and isopropyl alcohol .
- Visual Fault Locator (VFL) or Optical Power Meter: For testing the connection .
- Safety equipment: Gloves and safety glasses to protect against fiber shards .

Step-by-Step Connection Process

1. Prepare the Fiber

- Strip the outer jacket and buffer coating carefully using a fiber optic stripper .
- Inspect the fiber for damage, avoiding kinks or bends
