

How to install batteries in a smart optical distribution box

Article Overview

Install batteries in a smart optical distribution box by placing them on trays, connecting cables correctly, and following safety precautions to ensure proper operation.

Preparation and Safety

Before starting, ensure the circuit breaker is turned off to prevent electrical shock. Use insulated tools when handling batteries and cables. Verify that the batteries and accessories are free of damage and that you have the correct battery type and capacity for your distribution box ().

Installing Battery Trays

- Remove battery trays from top to bottom if they are pre-installed.
- Install trays first in the cabinet, ensuring proper spacing between supports for safe operation.
- Place separators between adjacent batteries to prevent contact, unless the battery capacity is ≥ 80 Ah, in which case separators in the depth direction are not required ().

Placing and Connecting Batteries

- Place batteries onto the trays from bottom to top. Do not move all batteries into the cabinet at once.
- Connect battery cables according to the wiring diagram provided with the distribu...
