

How to install flanges in fiber optic distribution boxes

Article Overview

Flanges in fiber optic distribution boxes are installed by securing brackets to the box and mounting them onto the rack, ensuring proper alignment and cable management.

Step 1: Prepare the Distribution Box and Flanges

Before installation, determine the orientation and position of the fiber optic distribution box according to your network layout. Ensure you have all necessary flanges, brackets, screws, and tools ready. Flanges typically attach to the sides of the distribution box to allow secure mounting on a rack or wall .

Step 2: Attach Flanges to the Box

- Align the flanges with the designated mounting points on both sides of the distribution box.
- Use the provided screws or bolts to secure the flanges firmly to the box.
- Ensure the flanges are level and parallel, which is critical for proper rack alignment and stability .

Step 3: Mount the Box on the Rack

- Position the distribution box with attached flanges at the designated location on the rack....
