

How to install the drop switch in the distribution box

Article Overview

Installing a drop switch in a distribution box involves proper placement, secure wiring, grounding, and testing to ensure safe and reliable operation.

Step 1: Safety First

Before starting, turn off the main power supply to the distribution box to prevent electric shock. Use insulated tools and wear protective gloves. Verify the absence of voltage using a multimeter.

Step 2: Choose the Right Drop Switch

Select a drop switch (MCB or isolator) suitable for the load it will control. Ensure it matches the voltage and current rating of the circuit and is compatible with the distribution box's DIN rail or mounting system.

Step 3: Prepare the Distribution Box

- Open the distribution box and identify the DIN rail or mounting location for the drop switch.
- Ensure there is enough space for wiring and future maintenance.
- Check that the neutral and grounding busbars are accessible.

Step 4: Mount the Drop Switch...
