

# Huijue 1-core single-mode fiber

## Article Overview

Huijue Single-Mode Single-Core Fiber is a high-performance optical fiber designed for long-distance, low-loss data transmission with excellent bend insensitivity.

### Overview

Huijue single-mode single-core fibers, such as the LC UPC and SC APC pigtails, are designed for long-distance optical communication. They feature a 9/125  $\mu\text{m}$  core/cladding diameter and comply with G657A2 standards, which ensures bend-insensitive performance, making them suitable for installations in tight spaces or complex routing environments. These fibers are optimized for minimal signal loss and high reliability, supporting high-speed data transmission over extended distances.

### Key Features

- **Single-Core Design:** Uses a single light-transmitting channel, ideal for long-distance applications with minimal interference.
- **Single-Mode Operation:** Light travels in a single, straight path, reducing modal dispersion and maintaining signal integrity over long distances.
- **Bend Insensitivity:** G657A2 standard ensures the fiber can withstand tight bends without significant signal degradation, improving installation flexibility.
- **Durable Materials:** Industrial-grade construction enhances wear resistance and reduces maintenance costs, suitable for data centers and telecom networks.
- **Standards Compliance:** Meets IEC, TIA/EIA, and RoHS directives, ensuring compatibility with mainstream optical devices ....
