

Imported OTN Router SFP

Article Overview

Imported OTN router SFPs are pluggable optical transceivers that enable high-speed, flexible transport of Ethernet, TDM, and SONET traffic over Optical Transport Networks.

Overview of OTN SFPs

OTN (Optical Transport Network) SFPs are designed to bridge legacy TDM networks with modern IP-based networks, providing a converged transport layer for multiple protocols. They encapsulate Ethernet traffic into OTU containers (OTU1e, OTU2e, OTU3, OTU4) depending on the data rate, supporting 10G, 40G, and 100G Ethernet interfaces on routers like the Cisco ASR 900 series . These SFPs allow seamless integration into OTN networks while maintaining compatibility with existing infrastructure.

Types of OTN SFPs

- Standard OTN SFPs
- Support Ethernet, TDM, and SONET traffic aggregation.
- Encapsulation types: OTU1e/OTU2e for 10G, OTU3 for 40G, OTU4 for 100G .
- Enable IPoDWDM technology for efficient wavelength-division multiplexing.
- GPON SFPs
- Designed for Fiber-to-the-Home (FTTH) or business services.
- Plug-and-play modules that integrate GPON OMCI stack and comply with ITU-T G.984 standards .
- Can be used in routers with standard SFP ports for GPON networks, supporting ON...
