

Independent switch distribution box for construction site

Article Overview

Independent switch distribution boxes provide safe, mobile, and standards-compliant power distribution for construction sites, with options for pre-wired or customizable setups.

Overview

Independent switch distribution boxes, also known as construction site power distributors, are designed to safely distribute electricity to various equipment and temporary installations on construction sites. They are typically pre-wired or modular, allowing rapid deployment and flexibility for different site requirements. These boxes can be wall-mounted, floor-mounted, or installed on supports, and are suitable for both indoor and outdoor use.

Key Features

- **Standards Compliance:** Most construction site distribution boxes comply with IEC 61439 and IEC 60364, ensuring safety and reliability.
- **Housing and Protection:** Cabinets are made from robust sheet steel or technopolymer, often fire-resistant, with IP ratings from IP65 to IP67 for dust and water protection.
- **Safety Devices:** Equipped with residual current devices (RCDs), miniature circuit breakers, and master switches to protect circuits and personnel.
- **Mobility and Flexibility:** Many units are portable, allowing easy relocation on site....
