

# Installation of active optical device QSFP28

## Article Overview

QSFP28 active optical devices should be installed with proper ESD precautions, careful handling, and correct port alignment to ensure reliable network performance.

### Safety and Preparation

Before installing a QSFP28 transceiver or active optical cable (AOC), follow these safety measures:

- **Electrostatic Discharge (ESD) Protection:** Wear an ESD wrist strap and connect it to a grounding point to prevent damage to the transceiver or cable ( ).
- **Laser Safety:** Avoid direct exposure to the optical interface, as QSFP28 modules emit laser light ( ).
- **Dust and Port Protection:** Keep transceivers covered with rubber safety caps when not in use, and remove dust covers from device ports only when ready to insert the module ( ).

### Installation Steps

- **Disconnect Existing Cables:** Remove any fiber-optic or copper cables from the port before installing a new QSFP28 module ( ).
- **Remove the Transceiver from Packaging:** Handle the module by its edges and avoid touching the electrical connector pins ( ).
- **Align the Module:** Orient the QSFP28 transceiver so that the connector matches the port orientation. Ensure the locking mechanism is aligned ( )....
